SUMMARY

Frontend Engineer with 7 years of experience building interfaces with React, Next.js and TypeScript at a product company. I specialize in high-traffic landing pages, reusable component libraries connected to a headless CMS, web performance (Core Web Vitals), SEO and accessibility. I work closely with designers and product managers, and I take features from architecture to production.

EXPERIENCE

Frontend Engineer | CookUnity, Growth Team (First Impression) 2018 – 2025

- Led the homepage rebuild during a full company rebranding, and owned the homepage and its satellite pages for 5 years.
- Built and maintained 20+ landing pages in Next.js for the Marketing team, with a focus on performance, SEO and accessibility.
- Built and maintained a library of about 60 reusable components (React, TypeScript, Tailwind, Storybook, Atomic Design), adapted to receive content from Strapi so Marketing could build and edit pages without depending on developers.
- Reduced LCP on the main landing pages by optimizing images, font loading and third-party JavaScript.
- Ran 30+ A/B experiments and feature rollouts (Unleash, Segment) to improve user activation and conversion, working with designers and product managers.
- Contributed to MVPs and helped resolve production incidents and bugs, monitoring with Datadog.
- Earlier in the role, supported the development and maintenance of the subscription platform.

PERSONAL PROJECTS

- Bilingual (EN/ES) personal portfolio with dark mode, built with React and Next.js.
- Component library connected to a headless CMS (in progress).

SKILLS

Frontend: React, Next.js, TypeScript, Tailwind CSS, Styled Components, GraphQL, Storybook

CMS: Strapi

Performance & quality: Core Web Vitals, SEO, accessibility (semantic HTML, keyboard navigation)

Tools: Git, Figma, Jira, Datadog, Argo, Unleash, Segment

LANGUAGES

Spanish (native) · English (intermediate)

EDUCATION

CourseIt: Advanced Frontend (React, Redux, Next.js) and JavaScript (JavaScript, React.js, Node.js), 2019

Ada Frontend Development Bootcamp: Computer Programming, 2017
